Multiple Media

GRAEF provides visualizations in a broad array of products including:

- Animations
- Stand-alone exhibits
- Report documents
- Web-based documents
- CDs, DVDs and other formats that facilitate client communication protocols.

In addition, GRAEF provides detailed narratives, diagrams, labels, and explanatory materials to assist audiences in understanding the key aspects of the visualizations.

Interactive Dialogue

GRAEF is also experienced at combining visualization systems with a variety of interactive media including touch screens and smart boards.
